OBJETIVE

Front End Developer / Python Developer

PROFESSIONAL SUMARY

Front-End Developer with experience in creating intuitive and responsive web interfaces, combined with a solid background in process automation and technical support. I have expertise in technologies such as Python, JavaScript, SQL, HTML5, CSS3, WordPress, and automation tools, with a strong focus on improving efficiency and user experience. I highlight my ability to develop web applications and bots with API integration, in addition to optimizing complex processes through automation. With a proven track record in freelance projects and technical support, I offer a practical and innovative approach to problem solving and implementing technological solutions.

PROFESSIONAL EXPERIENCE

Python Developer | Freelance 06/2006 - 09/2015

- Development of automation systems in Python for manual tasks, including the creation of desktop applications with graphical user interface (GUI).
- Implementation of an automated system for Western Union in the back-office sector, using Python to process a database containing all monthly transactions from 162 correspondents.
- Creation of a script that separates the data by correspondent, saves each file in separate folders and performs automated calculations of the commissions to be paid, including the 10% deduction for marketing to be discounted in the following month.
- Optimization of the process, reducing the execution time from 5 hours manually in Excel to just 5 minutes with the new automated system.

Web Developer | Freelance 01/2015 - 06/2018

- Maintenance and development of systems: I updated and maintained systems using HTML5, CSS3, JavaScript and React, ensuring the implementation of the best coding and optimization practices to guarantee the performance and responsiveness of the systems.

Technical Support | Maclen 06/2006 - 09/2015

- Daily registration and monitoring of tickets, ensuring efficient resolution according to customer demands.
- Proactively identifying and solving problems in the systems used by the company.
- Performing regular queries in databases for technical support and fault diagnosis.
- Providing specialized service via help desk, ensuring agile and effective support to users.

PROJECTS:**Western Union (BackOffice) (2024)**

- Leadership in the development of an automated system in Python to generate monthly transaction reports for all Western Union agencies in the country.
- Daily automation of the data division process by agency, calculation of total commissions and marketing percentages, with storage of reports in folders organized by month.

Freelance: Java CRUD / Rest API (2024)

- Daily development of a RESTful API using Spring Boot, Hibernate, PostgreSQL and Docker.
- Building a robust foundation for creating scalable and efficient web applications, focused on backend services.

Freelance: Currency Quote Bot (2023)

- Implementation of a bot on Telegram to provide daily quotes for different currencies, such as the official dollar, blue dollar, MEP dollar, Brazilian real and euro.

- Use of web scraping techniques to obtain real-time data, displaying purchase and sale values for each currency.

Freelance: Django Web App (2024)

- Daily development of a web application with Python integrating Django, HTML, CSS and JavaScript.
- Creation of an intuitive and easy-to-use interface for scheduling management, with real-time recording and secure integration with the SQLite database.

EDUCATION

Systems Analysis and Development, Estácio (2026)

SQL Server, Udemy - 2024

AWS Discovery Day, Estácio - 2024

Alteryx Foundational Micro-Credential, Alteryx - 2024

Banco de Dados com Java, Udemy - 2024

Aplicaciones Java FullStack, Udemy - 2024

JavaScript, EducacionIT - 2024

Python Programming, EducacionIT - 2023

Bases de Datos e SQL, EducacionIT - 2022

TOOLS

Python, SQL, JavaScript, Java, WordPress, Django, React, Pandas, Spring Boot, Docker, Postman, Html5, Css3, Adobe Photoshop, Adobe Premiere
