OBJECTIVE

Motivated Python Developer with experience in process automation and web development. Seeking a role to apply skills to enhance system efficiency and develop effective web and software solutions.

PROFESSIONAL SUMMARY

Developer with extensive experience in process automation and backend development. Proficient in Python, SQL, and web technologies (HTML5, CSS3, JavaScript). Proven ability in streamlining workflows, developing web applications, and integrating APIs. Recognized for innovative problem-solving and successful freelance projects.

PROFESSIONAL EXPERIENCE

Python Developer | Freelance
2019-2024

- Developed automation systems in Python, including desktop applications with graphical user interfaces (GUI).
- Implemented an automated system for Western Union, processing transaction data from 162 correspondents, reducing execution time from 5 hours to 5 minutes.
- Created a script for data separation and automatic commission calculations, including marketing deduction.
  Projects:
- **Western Union (BackOffice) (2024)**
- Led the development of an automated Python system to generate monthly transaction reports for all Western Union agencies in the country.
- Automated daily data division by agency, calculated total commissions and marketing percentages, and organized reports in monthly folders.

Web Developer | Freelance
Jan 2015 - Jun 2018

- Updated and maintained web systems using HTML5, CSS3, JavaScript, and React, ensuring optimal performance and responsiveness.

Technical Support | MacLen
Jun 2006 - Sep 2015

- Managed tickets and proactively resolved technical issues.

- Performed regular database queries for technical support and fault diagnosis.
